Promoting Community
Fluency in Reading and Math
2025-2026

Dear Parents and Guardians,

Summer is a perfect time for students to practice reading and math to help them maintain or further progress their fluency in reading and math skills. In an effort to maintain the learning growth from the school year, it is expected that your child completes the following assignments over the summer. This allows a review of reading and math concepts from the most recently completed school year, while also previewing upcoming content for the next school year. **They will be required to read one or more books or novels listed below by grade level and complete Reading and Math Practice on IXL.** They will be given an AR quiz upon returning to school on the novel. We have also purchased a school membership for IXL, an online learning platform that allows students to practice Math and English Language Arts at their own level. **We ask that your student spend 30-60 minutes per day on IXL practicing Reading and Math skills in addition to completing the assigned book(s).**

Have a safe summer,

Your Teachers
